Exoot

All objects, installations and acts dreamt up by Tristan Kruithof are realized under the banner of EXOOT. Tristan is responsible for the artistic and practical supervision of our performances at festivals and other events.

We perform with interactive objects and installations at festivals and art events. Beside that we are specialized in mobile DJ acts with a unique look. We know how to throw a party and how to provide an exciting musical backdrop. We've been hunting for musical treasures for years now. Records from the early fifties and sixties, original vinyl pressings, of course!

Ami 6

A Citroën with a modest dose of positivism grooves, flirts and flies along the streets in search of companions. The first successful summer season has come to end we are preparing for a second season. Coming months, we are updating all technical aspects. Our goal is to make Ami6 more interactive, more divers and give it better looks. The Ami6 project is a collaboration with **Edwin Dertien**.
