

The Table of Thoughts

Ola Szostak & Willemijn Schellekens

TECHNICAL RIDER

Dimensions

1 table, 12 seats, 4 meters long x 1,20 meter large.

Area needed: 5x7m.

➤ Outside or inside; if needed we have a tent to protect the installation and the audience from the rain.

If we use our tent, we need 8 x 10 kg weights to put on the tent poles (to be supplied by festival).

Audience

One thought is 3 minutes x 12 thoughts is 180 thoughts per hour.

We play 5 hours per day (max 6)

We wish to have a one hour break.

Location

We need a sturdy tree branch or another device above the table to hang our chandelier.

Electricity

We only need 220 volt at the table (to be supplied by festival) for our own small sound system. We play table sounds from the speakers.

At night we need light above the table (to be supplied by festival).

Building and breaking down

We need 3 hours to set the table, 1,5 hours to break down.

Our car must be able to reach the location for loading.

For the building and break down we need a ladder.

Personnel

The table is staffed by two of our people. They invite the audience to sit down and they start the mp3-players.

We need 1 volunteer from the festival to help us and guard the table during our breaks.

Surveillance

If the table is booked for more than 1 day, we ask the festival to see to the safety of the location and the table. It is not an option to break down the table at night and build again the next day.

Transport / overnight

➤ We travel with 2-3 persons in a small van.

In case of an overnight stay, we would prefer two single rooms.

One of us is vegetarian.
