

## Technical Rider

# ChipsCowboys

### General

Length: 5 hrs maximum (with a break)

Public: The show can be seen by a big audience and be done by a lot of people.

➤ Team: 2 persons

### Space

Ideally 6x12m FLAT surface (minimum 4x10m)

➤ We will secure the area with a red rope.

We prefer a quiet background (i.e. a building). The public cannot be allowed to walk behind the target.

We need a cover, tent, easy-up or covered spot in case of rain.

### How does it work

The potato canon is a compressed air system and can only be aimed at the shootingboard.

Only one person at a time will be allowed inside the red rope area to shoot chips.

➤ Our potatoes are Bio (as soon as they're in season), cleaned and brushed one by one.

➤ The leftovers are fed to pigs and the oil is used as bio diesel.

### Electricity, sound & light

We need 2 groups 220 volts for our frying machines (3000 watts per group).

➤ We have a sound set that will be sufficient for 200 people audience. We are not loud but we are present.

We ask the festival to take care of the lights if we play in the evening. Please contact us about the details.

### Backstage

We need a space where we can store equipment & dress.

### Set up/Break down

We come by car + trailer and we need a parking space close to the performance area.

The car must be able to access the performance area for unloading and loading.

➤ We need 1,5 hour to set up the show.

➤ We break down in 2 hours. With lighting the set up and break down will take longer.

### Hotel/meals

If an overnight is agreed, depending on the team we need a double room or two single rooms.

We are 1 carnivore and 1 gluten free.
