

## Mira T Technical Rider

### General

All audiences

Duration: 40 to 45 minutes

Public: 300 persons (depending on location)

Maximum 3 shows per day (min. 1,5 hrs between shows)

The public can be seated 360°

2 persons on the road

### Space

A minimum floor space of 11 metres diameter is required, with a minimum height of 5,5 metres.

Space needed with audience included is 17 meters diameter.

The location should be level and flat. We can play on a mowed lawn and as little holes and bumps as possible.

➤ Our rig does not require weights, pegs or anchor points.

➤ We don't need a floor.

➤ We prefer a quiet space.

### Sound & light

➤ We bring our own sound system.

The festival will need to supply electricity (220 volt) and cabling to the performance area.

➤ We can perform in the evening.

The festival is to provide lighting if we play after dark. Please contact us about this in advance so we can agree on the details.

### Backstage

We need a private/secure place where we can warm up and change near to the performance area, with a chair, a table, a mirror, a toilet and preferably a shower.

Please provide tap water backstage.

### Set up/Break down

Our car and trailer must be able to access the performance area for unloading.

➤ We need 1,5 hours to set up and 1 hour to dismantle. We start building 4 hrs before the show.

We need 1 strong volunteer to help with set-up and dismantling.

### Parking

We travel with a minivan (Ford Transit) and will need parking space close to the performance area.

### Hotel and Meals

We are a team of 2 with no diets.

If an overnight is agreed we ask for 2 single rooms.
